EDUCATION

Information Science and Engineering
RV Institute of Technology and Management
GPA: 8.20

2023 – 2027
Bangalore, Karnataka

Pre-University
Sri Vidyaniketan PU College

20 – 2020
Gangavathi,Karnataka

SKILLS

Programming Languages Java , Python, Full Stack Web Development(HTML,CSS,JavaScript,React,NodeJs, MySQL)

Hackerrank

Gold badge in problem solving and Java (@eshwarchowdaryt)

PROJECTS

Task Manager | Python
An application developed using python
- Implemented queue concept of data structures.
- Made with PyGame and NumPy modules for graphics.
- Integrated calendar and Alarm to add tasks and notification.

Tic-Tac-Toe | Java
2 player has a better UI developed using Java
- Developed using Stack,Queue and graph for moves and decide the winner.
- Implemented an AI opponent using minimax algorithm.
- User can also choose a multiplayer option to play with his friend or globally.

Financial Tracking System | Java
A application for tracking the expenses and income of a user.
- Implemented using object oriented concepts.
- A user can login and can see the tracking of his expenses and also can view his income.
- User will get to know how much he is spending and can be aware of it.

Obstacle Avoiding Robot | Arduino
A robot that detects the object and changes its direction
- Implemented using Arduino UNO and IR Sensor.
- Robot detects the obstacle in its way and changes the direction and moves in the free path.
- Integrated display to show the user in which direction it is moving and the direction of its turn.
